

MX210 Series

The Ethernet I/O-Modules of the MX210 series are available in different variants depending on the combination of the number, type, and properties of their inputs and outputs. The MX210 series includes modules featuring high-frequency inputs of up to 100 kHz for high-speed counting.

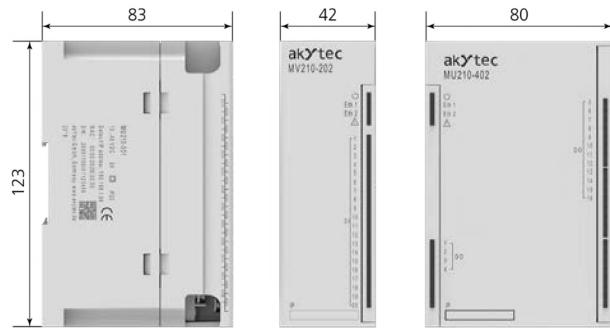

Each module of this series has two built-in Ethernet ports. This allows interconnection of these devices according to the daisy chain connection, which stands out by simplicity and scalability. The two Ethernet ports are bypass-capable, meaning that the data transfer is not interrupted even if one of the modules fails.

Any MX210 extension module can simultaneously communicate with up to 4 TCP clients, which facilitates cabling and configuring of the control system.

Functions and features:

- Up to 32 DI / 16 DO | up to 8 AI / 8 AO
- A wide range of various digital and analog inputs and outputs
- Network status diagnostics
- Supported protocols: Modbus TCP, MQTT, SNMP, SNTP
- 2-port Ethernet Switch (LAN bypass)
- Daisy-Chain Wiring
- Alarm signals
- Real-time clock
- Data logging
- Group configuration of multiple modules
- Easy mounting and connection
- Free of charge configuration tool

BPS210-60.S

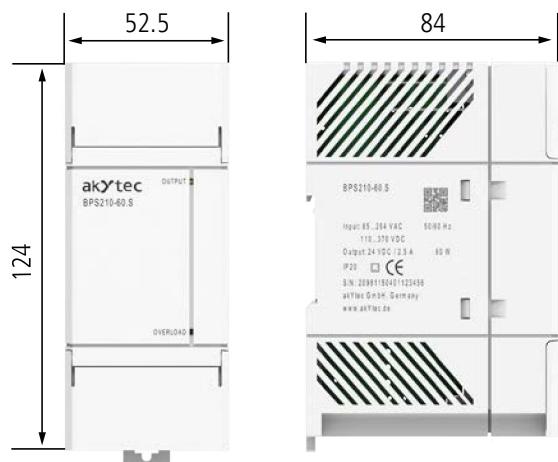

The BPS210-60.S is a two phase power supply unit with an integrated output-relay fit for the demanding solutions. It offers maximum functionality for applications in complex systems and machines. The power supply steps down the voltage from 230V AC to 24V DC. Output voltage can be adjusted with a trimmer ($\pm 8\%$). Thanks to the extremely space-saving narrow design, they are particularly suitable for industrial applications in switch boxes or in small control cabinets. To increase the output power, several power supply units of the same type can be connected in parallel. Warning! Improper use can lead to hazards such as short circuit, fire, electric shock, etc.

Functions and features:

- Relay output for alarm
- Parallel connection (for power redundancy).
- Adjusting output voltage ($\pm 8\%$)
- High stability of output voltage (permissible variation less than 2 %)
- Minimum ripple (0.5%)
- Voltage and current output limit
- Overvoltage and surge protection
- Overload, short circuit and overheat protection
- Universal AC/DC input voltage range
